10 QUICK WAYS TO CUSTOMIZE YOUR HOMES.COM FUSION WEBSITE

When you sign up for a website through Homes.com, there are only a few things you need to do to get your site up and running. However, there are a lot of things you can do if you're looking to personalize your website for the best results. Check out this list of 10 quick and easy edits to customize your site, fast.

1. Pick your *design theme*. Start by activating your favorite layout option. Then, click the "customize" button to select a background image and color theme.

2. Add a widget to your website. Homes.com has a variety of *personalizable widgets* to choose from. These include commute time, social networking, home values, and more.

3. Make your services more accessible by *adding a translator to your website.*

4. *Customize your "about me" page* to tell your story. Consider writing about why you got into real estate, how long you've lived in the area, or why you are the best agent to help your clients buy or sell their home.

5. Create a *featured search* to highlight your favorite niche, neighborhood, or price range.

6. Set up your *user registration options* to capture more leads.

7. Activate your *Homes.com Website Blog* to share your social networking news with your website visitors.

8. Edit your *default property search results view*! Choose whether you want map search or photo search to show as the default, then choose your default sort preference.

9. Decide which of your properties you want *featured on the homepage of your website*.

10. Add a *domain name to your site* to make it easy to find.
